- Timeless design for classic waiting areas
- Durability through the use of high-quality materials
- Die-cast aluminium brackets enable easy attachment to the cross beam
- A shell-specific adapter bridges the gap between the shell and the bracket for connection to the beam seating system
- A large range of shells, made of mesh over plastic, wood and upholstery make it suitable for use in a wide range of areas
- Optional armrests on the end and between all seats plus tray tables offer additional design options

Designer: Roland Schmidt Design

model no.

10102

Shell variants

**shell hero plus with mesh material (201)**

plastic frame, with knee roll and integrated handle bar, with mesh covering mesh material Mesh Perform

**shell hero plus plastic (51)**

shell 51 plastic, shell three dimensionally shaped, with flattened edge invisibly screwed

**shell hero plus wood (61)**

shell three dimensionally shaped, with flattened edge invisibly screwed

**shell hero plus fully upholstered (160)**

shell fully upholstered

frame

- legs die-cast aluminium
- zinc die-cast cover cap
- beam aluminium

standard finish

- shell with mesh covering (201), black plastic frame
- shell (61) natural beech, satin lacquered
- legs polished, cover cap chromed, beam natural anodised
- basic gliders plastic (01)

options and accessories

- shell with mesh covering (201), stone plastic frame
- shell (61) beech stained according to beech standard range, satin lacquered
- legs, cover cap and beam coated in selected colours
- floor fixing, only material, assembly on site
- wall-distance-device

tablet on beam (instead of seat), dimension 43 x 43 cm

- HPL according to standard range, ABS edge, chipboard top 20 mm thick
- HPL according to standard range, edge BK natural beech, satin lacquered, chipboard top 20 mm thick
- edge BK beech stained according to beech standard range, satin lacquered

upholstery

- seat liner
- seat and back liner
- through liner
- fabric / leather according to Brunner standard range (including artificial leather)
