- The clue's in the name: the table leg covers have a wavy linear design
- In addition to large table dimensions, the steel construction of the table legs combined with a sophisticated support structure for the table top also enables a variety of shapes
- For use in exclusive conference rooms
- The wavy wood or metal cover can be removed without tools and stained or powder-coated in various colours. As can the pilaster strip that covers the side of the table leg
- The cable guide rail is inside the table leg. Thanks to the tool-free removable frame cover, this is easily accessible
- A wide range of customisation options are available on request
